CAREER OBJECTIVE

Frontend Developer with 1 year of professional experience and 2+ years of hands-on experience building web applications using React.js and Next.js. Skilled in developing full-stack solutions with Node.js and Express, focusing on performance, scalability, and clean UI development.

WORK EXPERIENCE

Softvance agency (March 2025 - present)

Frontend Developer

- Built and maintained SaaS platforms using React.js, TypeScript, Redux, and shadcn-ui, with role-based dashboards and secure authentication.
- Optimized performance and state management for large datasets, improving responsiveness and user experience.
- Collaborated with cross-functional teams to deliver scalable, production-ready features with clean, maintainable code.

SKILL

Frontend: React.js, Next.js, JavaScript, TypeScript, Redux, Zustand, TanStack Query, React Hook Form, TailwindCSS, ShadcnUI, Zod, Motion.

Backend: Node.js, Express.js, PostgreSQL, MongoDB, Firebase, Prisma, Mongoose.

Tools: Git, Chrome Dev Tools, VS Code, GitHub, Webflow, Framer, Figma.

PROJECT

JobZilla

[Live site](#) | [Server](#) | [Client](#)

JobZilla is a full-stack SaaS job portal that connects candidates, recruiters, and administrators through role-based dashboards, streamlining the hiring process with centralized management tools.

Features:

- Each user (candidate, recruiter, admin) gets a tailored dashboard to monitor applications, job postings, and system metrics.
- Candidates can easily apply to jobs, track their status, and receive updates directly on the dashboard.
- Enhanced candidate–recruiter collaboration through real-time communication features.
- Admins have a full suite of tools to manage users, monitor engagement, and analyze hiring trends.

Technology: React.js, ShadcnUI, Typescript, Redux, Node, Express, Postgres, Prisma, socket.

Agri-Tech

[Live site](#) | [Github](#)

AgriTech is a full-stack platform built to support farmers with a marketplace, inventory system, AI-based pest detection, and community features to improve farming efficiency.

Features:

- I built a marketplace and inventory management system, allowing farmers to list products, sell directly to customers, track stock efficiently, and display all information on a farmer dashboard.
- I integrated **AI-powered** pest detection using photo analysis to help farmers protect their crops.
- A forum for farmers to discuss agricultural topics, share knowledge, and collaborate.
- Farmers can explore various resources, tips, and guidelines to improve their farming practices.

Technology: HTML, Tailwind CSS, React.js, Next.js, MongoDB, Typescript, Mongoose, NextAuth.

EDUCATION

B.A. (Hons) in Islamic History & Culture

Session: 2022 – Present (3rd Year Running)

National University, Bangladesh

LANGUAGE

Bangla: Native, **English:** Comfortable, **Hindi:** Fluent
